

# MEDICATIONS SOMETIMES ASSOCIATED WITH WEIGHT GAIN<sup>1</sup>

## CATEGORY LIST

### ANTIHISTAMINES:

- Allegra® (fexofenadine)
- Zyrtec® (cetirizine)
- Benadryl® (diphenhydramine)

### ANTICONVULSANTS / ANTIMIGRAINE:

- Depakote® (divalproex)
- Depakene® (valproic Acid)
- Tegretol® (carbamazepine)

### ANTIDEPRESSANTS:

- Elavil® (amitriptyline)
- Tofranil® (imipramine)
- Paxil® (paroxetine)
- Zoloft® (sertraline)
- Remeron® (mirtazapine)

### ANTIPSYCHOTIC / MOOD STABILIZERS:

- Zyprexa® (olanzapine)
- Risperdal® (risperidone)
- Seroquel® (quetiapine)
- Clozaril® (clozapine)
- Thorazine® (chlorpromazine)
- Lithobid®/Eskalith® (lithium)

### ANTIDIABETICS:

- Diabeta® (glyburide)
- Glucotrol® (glipizide)
- Insulin (various)

### ANTIHYPERTENSIVE:

- Cardura® (doxazosin)
- Inderal® (propranolol)
- Lopressor® (metoprolol)
- Tenormin® (atenolol)

### GERD / HEARTBURN:

- Nexium® (esomeprazole)
- Prevacid® (lansoprazole)

### MISCELLANEOUS:

- Neurontin® (gabapentin)
- Birth Control pills (various)
- Statins (e.g. lovastatin, simvastatin)

### STEROIDS:

- Deltasone® (prednisone)

## ALPHABETICAL LIST

Allegra® (fexofenadine)  
Benadryl® (diphenhydramine)  
Birth Control (various)  
Cardura® (doxazosin)  
Clozaril® (clozapine)  
Deltasone® (prednisone)  
Depakene® (valproic acid)  
Depakote® (divalproex)  
Diabeta® (glyburide)  
Elavil® (amitriptyline)  
Eskalith® (lithium)

Glucotrol® (glipizide)  
Inderal® (propranolol)  
Insulin (various)  
Lithobid® (lithium)  
Lopressor® (metoprolol)  
Neurontin® (gabapentin)  
Nexium® (esomeprazole)  
Paxil® (paroxetine)  
Prevacid® (lansoprazole)  
Remeron® (mirtazapine)  
Risperdal® (risperidone)

Seroquel® (quetiapine)  
Statins (various)  
Tegretol® (carbamazepine)  
Tenormin® (atenolol)  
Thorazine® (chlorpromazine)  
Tofranil® (imipramine)  
Zoloft® (sertraline)  
Zyprexa® (olanzapine)  
Zyrtec® (cetirizine)
